INSTALLATIONS NOTES:

Install these acrylic fixtures according to the installation manual. Confirm specifications before starting installation.

Note Overflow hole is not pre-drilled (See General Information)

General Information

- The tub is manufactured using two wall acrylic technology which bonds the walls together as one (there is not a panel around the bath).
- The tub should be secured to the floor by applying a bead of silicone around the base (this can be cut in future should access to the plumbing be necessary).
- This tub accommodates an exposed (fire hydrant) waste and overflow. The overflow hole is not drilled to allow for various overflow installations.
- Installation must be carried out according to the manufacturers instructions.
